

## Remote Backup Service

**Start the Year off with a Back-up Solution !**  
**If you are using a tape—Have us make sure it is working !!**  
**If you need a backup solution we can help from a conventional Tape to our new online backup service.**  
**We don't want to have to say I told you so.**

**Let North Coast Computers Help if you need a backup solution !**  
**Let us get you sleeping soundly with a great backup**  
**We have another great service for one of the most important parts of your business.**  
**Here how it works !**

The process is really quite simple: Your computer connects to our storage computer via modem or the internet and transfers your data in a compressed and encrypted file. You tell us how many back ups you need from 30 days to each day Your data is copied onto CD-ROM or Backup Tape and stored. This provides a full 365 days of incremental backups. On any given day in any business, tasks tend to get priority in order of immediate importance. There seems to be too many things to do and not enough time to do them. That is a fact of life in running a business. Backups tend to end up somewhere at the end of the list. Protect your mission critical data today!!

Here are some of the program we can custom quote any job

**30 day personal plan—Great for one computer that just needs a backup done every day. 100 meg of data 30 days of restore available—Free online restore \$35.00 per month**

**Small office plan—1 computer 200 meg data . From 30 days of archives to 1 year of data archives. From \$55.00 per month. Plus hourly setup fees.**

**Small network plan 1 Gb of data back up , 1 year of data stored at our facility Back-up multiple computers and your server. \$ 150.00 per month.**

***If you are interested click here and fill out the form and we can get you some more information***
